REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

After reconsideration of the captioned application, a person of ordinary skill in the art that the designation TR is used to specify the part of the remaining liquid which is recirculated, and that the designation TA is used to specify the part of the remaining liquid which is discharged.

With regard to the rejection under section 103(c), Chanf fails to teach or suggest to those of ordinary skill to modify its teachings to include from 0.05 to 0.5% by weight of catalysts including an alkali metal alkoxide or an an alkaline earth metal alkoxide. In this regard, Chang discloses these catalysts for the claimed invention but teaches that small amount of catalyst prevents precipitation thereof, but the resulting yields are uneconomic and the process also requires mechanical stirring at the extremely high pressures involved. Accordingly, the reference teaches away from the instant invention of from 0.05 to 0.5% by weight of an alkali metal alkoxide or an an alkaline earth metal alkoxide.

Moreover, hang fails to teach or suggest to those of ordinary to modify its teachings to include a step wherein residual catalyst and catalyst degradation products are removed solids-free from a discharged part in a desalting apparatus and the remaining methanol is returned directly or indirectly to the reactor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
